Hiring Manager
Capgemini

Subject: Application for Software Engineer Intern

Dear Hiring Manager,

I am excited to apply for the Software Engineer position at Capgemini. As a Computer Science and Engineering undergraduate at the National Institute of Technology (NIT) Andhra Pradesh, I have developed a strong foundation in software development, data structures and algorithms, object-oriented programming, database management systems, and web technologies. I am eager to leverage my technical skills, problem-solving abilities, and passion for innovation to contribute to Capgemini's technology-driven solutions.

Through academic projects and hands-on development experience, I have gained practical exposure to the complete software development lifecycle. I developed a Hospital Appointment System using Django, JavaScript, HTML, CSS, and SQL, enabling efficient appointment scheduling and management. This project strengthened my understanding of backend development, database design, and user-focused application development.

In addition, I built a Smart Voice Assistance Application using Flutter and Dart that performs tasks through voice commands, enhancing user convenience through mobile technology. I also developed an AI-powered Draw & Guess Game using Python, TensorFlow, Flask, OpenCV, and Convolutional Neural Networks (CNNs), which deepened my knowledge of machine learning, real-time processing, and software integration.

My technical skill set includes C, Python, Java, JavaScript, SQL, Flutter, Django, Git, and GitHub. I am comfortable working with data structures, algorithms, object-oriented design principles, databases, and modern development tools. Beyond technical expertise, I have demonstrated leadership and collaboration as an Executive Member of the CSE Association and a Volunteer in the Coding Club at NIT Andhra Pradesh. These experiences have strengthened my communication, teamwork, adaptability, and project coordination skills.

I am particularly drawn to Capgemini because of its global reputation for delivering innovative technology solutions, fostering continuous learning, and empowering young professionals to grow in challenging environments. I am enthusiastic about the opportunity to contribute to high-impact projects while learning from experienced professionals and expanding my technical expertise.

I am confident that my strong academic background, hands-on project experience, problem-solving mindset, and willingness to learn make me a strong candidate for the Software Engineer role. I would welcome the opportunity to discuss how my skills and enthusiasm can contribute to Capgemini's success.

Thank you for your time and consideration. I look forward to the opportunity to speak with you.

Sincerely,

Mortha Spandana
